EDUCATION

Imperial College: galgotias university greater noida

BCA (Bachelor of Computer Applications)(GPA: 4.0 / 4.0)

EXPERIENCE

1. Developed backend systems using Django and Python
2. Designed and implemented RESTful APIs using Django REST 3 Framework
3. Built user authentication and authorization systems
4. Created and managed database models using SQLite/MySQL
5. Handled CRUD operations and server-side logic
6. Tested APIs using Postman and fixed bugs for better performance

Innovative Systems Inc.

Backend Developer Intern

PROJECTS

Blog Web Application (Django)

- Developed a full-stack blog platform using Django and Python
- Implemented user authentication (signup/login/logout)
- Enabled CRUD operations for posts and comments
- Managed database using SQLite and Django ORM
- Tested API endpoints using Postman

2. E-commerce Backend (Django)

- Built backend for product management, cart, and orders
- Implemented secure authentication and authorization
- Optimized database queries for better performance
- Integrated payment flow (demo)
- Used Git for version control and collaborati

E-commerce Data Pipeline

Technologies: Python, Django, AWS, Docker

- Automated data ingestion pipelines for large-scale e-commerce datasets, reducing processing time by 40%.
- Deployed RESTful APIs for integrating third-party payment services, improving system flexibility.

AI-Powered Recommendation System

Technologies: TensorFlow, Django

- Built a machine learning model to provide personalized product recommendations, increasing click-through rates by 25%.
- Integrated the model into a Flask web app with interactive visualizations using D3.js.

TECHNICAL SKILLS

Programming Languages: Python,

Frameworks and Tools: , Django, Numpy, Pandas Metaplotlib

Tools: Docker, PostgreSQL, AWS, Git And GitHub Actions

Frontend : (HTML, CSS, JavaScript)
